

# Oven Cleaner

fast and ultra-powerful  
oven cleaner reduces the  
need for hard scrubbing  
and scraping

**500**ml e

A fast and powerful solution to the problem of burnt on grease, oil and carbon deposits.

Designed to reduce the need for hard scrubbing.

Ideal for use on ovens, ranges, grills and griddles.

Oven Cleaning Gel has been designed for the periodic cleaning of kitchen appliances that are subject to grease and carbon build-up.

The thickened formulation allows for extra contact time and the cleaner to be active for longer.

**Directions:** Do not dilute, apply to surfaces with a clean cloth or brush, stubborn deposits may require agitating with a stiff brush. Leave to soak (1-2 hours). Rinse liberally with clean water, repeat if necessary. Protective gloves must be worn.

#### **IMPORTANT:**

Always refer to oven manufacturers instructions for cleaning.

Not to be used on self cleaning or continuous cleaning ovens.

Avoid applying to rubber seals, pilot lights, heating elements, electrical connection switches or thermostats, probes, gas burners and catalytic liners

Do not apply to exterior oven surfaces, worktops, aluminium, copper, linoleum, painted surfaces, plastic, glass, chrome or galvanised steel.

Not to be used on a hot oven.

Causes burns.

Wash hands and exposed skin after use.

Avoid contact with skin and eyes. In the event of contact, wash out with plenty of cold fresh water.

Wear suitable protective clothing, gloves and eye protection.

Do not use for medical or hygiene purposes and keep this product away from children and animals.

Not to be taken internally.

Do not mix this product with other preparations.

Store unused cleaner only in the original container. Dispose of container and material according to local authority guidelines.

Before using always try a small, inconspicuous test area and only proceed when satisfied.
