

Technical Details:

220-240V a.c.

50/60Hz

Ultrasonic frequency:

20KHz – 30KHz

Features:

- The device does not use any chemical substances and can be used widely in the home.
- The device is harmless to people and pets and does not interfere with electrical or electronic equipment.
- It repels spiders and a variety of pests such as bugs, fleas, cockroaches, silverfish etc.
- The device is transparent and emits LED light which can be used as a night light.
- The device covers an area of up to 200 square meters.
- For optimal coverage, it is recommended to use a device in every room or enclosed area.
- Initially you might see increased spiders' activity as spiders and other pests are highly disturbed by the repeller but soon they will leave the area covered by the device.

Instructions:

- Plug unit into socket of 220V-240V ac wall outlet.
- Operation LED will light up indicating the device is working.
- The photosensitive light LED will light up when it gets dark.

Warning:

- Do not place the device behind curtains, furniture or furnishing as this would reduce its effectiveness. Do not cover it with any object or sheet.
- Regularly remove surface dirt and dust once a month.
- The device should be placed in a well-ventilated environment away from direct sunlight or humidity.
- Disconnect from main power if not in use.
