

Diagram A

Battery details:

- 1x AA Ni-MH AAA
- 200mAh 1.2V battery rechargeable (per stake)
- Amorphous Solar Panel
- 35mm x35mm
- Size: 8.3cm x8.3 cm x33.5cm

How to install

Please carefully read the manual and then install the solar garden light accordingly.

1. Carefully remove all parts from the box.
2. Place the switch to "ON" from main body to activate the light (Diagram B)
3. Connect the mounting stakes and insert the sharp tip into the ground deep enough to stabilize the light.
4. Place the main body on the top of the mounting stake as shown in Diagram D.

Positioning

Try to place the light in a place where there is good sunlight exposure to charge your light properly.

Maximum sunlight exposure will allow the light to work for up to 8 hours.

The light is powered by solar energy through the solar panel on the light. The solar panel converts sunlight into electric energy and then charges the AAA Ni-MH rechargeable battery during the day. The light turns on automatically at night and turns off automatically at dawn. Now you can light up your garden or pathway at night without the use of any wire.

The runtime of the light depends on the amount of charging time that the solar panel is exposed to. A longer exposure to sunlight will increase the performance of the solar light.

Warnings & Precautions

1. If there is high ambient lighting nearby the LED light may be very dim as it is designed to work best in darkness. This does not mean that the light does not work and it is just operating based on the bright surroundings.
2. Please charge the light for a full day prior to first use in order for the light to perform at its maximum capacity.
3. Do not spray water onto this Flower Solar Light.

Replacing the Battery

To replace the rechargeable AAA Ni-MH battery please follow these steps:

1. Remove the transparent lens and main body
2. Remove the screw securing the battery cover
3. Lift the battery cover
4. Replace the old battery with a new rechargeable AAA battery (Battery specification 1.2V for rechargeable Ni-MH battery).

Remark

The lifetime of LED lamp is over 50,000 hours. You will never need to change it.

CARE AND CLEANING INSTRUCTIONS:

- Always switch off and remove batteries when not in use.
- Do NOT immerse in water.
- Do NOT use abrasive cleaners or sharp utensils to clean.
- Store the item in a cool, dry place.
- Wipe with a clean dry cloth.

BATTERIES

- Keep batteries away from children and pets.
- Install batteries in accordance with its polarity symbols.
- Remove the batteries if left for long periods.
- Never dispose of batteries in a fire.
- Battery disposal, spent or expired batteries must be properly disposed of and recycled in compliance with local regulations. For detailed information, contact your local authority.
- Follow the battery manufacturer's safety, usage, and disposal instructions.

DISPOSAL

- Dispose of all packaging, paper, cartons, plastic and plastic bags in accordance with your local recycling regulations.
- At the end of the product's lifespan please dispose of it at an authorised household WEEE waste recycling centre.
