

AVILO[®] Illuminated Waterfall Sculpture Assembly Instructions

Step 1 Fit the circular LED light base to the central hole with the lights pointing inwards.

Step 2 Connect the T-shaped hose connector to both fountain hose outlets.

Step 3 Connect the pump to the remaining T outlet.

Step 4 The pump and hoses should now look like this. Place the sculpture on top of the base, at an angle to leave space for filling with water.

Step 5 Pour approx. 1.5 pints (850ml) of water to base. Ensure that the pump is completely submerged in water.

Step 6 Position the fountain sculpture squarely on top of the base and route the cable through the semi-circular hole on the base of the sculpture.

Step 7 Plug in the mains adaptor and switch on.

Step 8 Once the water has begun to cascade from the top pool and into the stepped lower levels, place the crystal into the area above the LEDs.

IMPORTANT Do not spill water onto the mains adaptor. Do not connect mains adaptor to the mains supply if it is or has been wet. Do not allow the pump to run if it is not fully immersed in water. Disconnect from mains supply when not in use. This device is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the device by a person responsible for their safety. Children should be supervised to ensure that they do not play with the device.

AC adaptor: Input voltage 220-240V 50Hz 3.5VA • Pump: 12V 50Hz 3.9W.
