Please read these instructions carefully before installation. Please keep these instructions for future reference.

This security door chain provides an additional level of security to prevent unauthorised access to your property.

The door chain is easy to install and requires no drilling to attach to the door. The door chain comes complete with fixings to allow it to be secured to the door frame or adjacent wall.

The 28cm welded chain is easily placed over the door handle and reduces the risk of forced entry if the door is not locked.

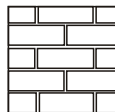

It is ideal for almost any style of door fitted with a standard swing handle. If in doubt please check with a competent DIYer or builder.

Dispose of all packing materials in an environmentally friendly manner.
