**AVILO**

**UV Light Glue** Repairs Almost Anything!  
UV Light Glue is a powerful liquid plastic welding compound that you can easily and quickly use to make permanent seals and repairs on almost anything. It can be applied to metal, wood, ceramic, glass, plastics, jewellery, toys, electronic cables, and more! This easy to use pocket-sized tool allows you to make strong and lasting everyday repairs with minimal time and effort.

Battery Type : Li-MnO2 Button Cell  
Model: CR2016

- Liquid solution only hardens once UV Light is applied. This unique feature makes it safer than super glues when accidental skin contact occurs.

**DIRECTIONS:**

- Clean/ Smoothen
- Apply
- Cure
- Shape
- Cures in seconds to make a strong and lasting bond
- Can be shaped, sanded, drilled, polished, and painted once hardened
- Water resistant and heat resistant properties
- Dries and hardens clear for less noticeable repairs
- The perfect tool for repairs on-the-go and DIY projects

Note: May not work with polyethylene or polypropylene plastics

Warning: Avoid contact with eyes and skin. Do not inhale vapors or ingest. If eyes are affected, rinse for 15 minutes. If skin is affected, thoroughly wash with soap and water. If inhaled, move to an area with fresh air. If ingested, rinse mouth and seek medical attention. If irritation occurs and persists after self-treatment, call a physician for further medical attention.

Caution: Do not mix old and new batteries; batteries are not replaceable and must be disposed of properly.
