3. Insert the extend tube into the main machine

## Assembly Tips:

Stand the vacuum on its end then add the handle and clip into place.

The clip is next to the electric cable. It is tight to get the clip to click in place. Move the handle slightly from left to right and put pressure on the clip and wait for it to click.

Another way of putting the clip in place is to put your thumb on the clip which is shown in photo 1 and push down and push the handle toward the vacuum part and at the same time move the clip very slightly left and right and it will click in place shown in photo 2.

4. Insert the floor brush into the extend tube

**5. Regularly clean and empty the filter and inside of the vacuum of all dust/grit to avoid risk of overheating.**

## HOW TO CLEAN:

1. Push the dust bin lip release button and empty the bin.
2. Push the dust bin release button and remove the dust bin from the main machine.
3. Remove the HEPA filter from the dust bin. Clean the dust bin and HEPA filter.

**Please read this instruction manual thoroughly before starting and ensure you are familiar with the operation of your new 2in1 vacuum.**
