

## ALWAYS POSITION IN DIRECT SUNLIGHT FOR BEST CHARGING

### Dimensions:

19.6cm x8.5cm x16cm

### Composition:

Resin

Battery: 1x Ni-Mh AA rechargeable battery  
LEDs not replaceable.

- SOLAR POWERED SO THE CENTRE OF THE PRETTY FLOWERS LIGHT UP AUTOMATICALLY AT NIGHT TIME
- BLUE TIT BIRD PERCHING ON THE STONE WELCOMES YOU AND YOUR GUESTS TO YOUR GARDEN
- DELICATE HANDPAINTED FLOWERS AND BUTTERFLY DESIGN
- LOOKS LIKE A REALISTIC STONE
- PUT IT PRIDE OF PLACE IN YOUR GARDEN
- WEATHER PROOF

### Assembly

Unpack the components carefully. Please check and ensure all parts have been removed from the packaging.

### How your Solar Bird Welcome Stone works

During the day, the solar panel converts sunlight into electricity and recharges the battery inside the solar panel. At night, the light turns on automatically using the electricity stored during the day. The number of hours the light stays on at night depends on your location and availability and intensity of sunlight during the day. Under normal conditions, if the solar panel is charged in full, direct sunlight all day, the light should stay lit for several hours at night.

### Positioning

Select a location in full, direct sunlight where your solar flower spinner can receive at least 6-8 hours of daily sunlight. Shadowed locations will not allow the battery to charge fully and will reduce the hours of night time lighting. DO NOT select locations near night time light sources such as streetlights, flood lights or other strong outdoor or home lighting. This may cause the solar lights to turn off automatically.

### First Time Use

Leave the power switch on the "ON" position until the solar panel has been charged in direct sunlight 6-8 hours. This allows the rechargeable battery to reach maximum capacity. If the light does not come on after a full day of charging, check to be sure the power switch is in the "ON" position and that the solar cell is in bright, sunny spot rather than in the shade. The light will automatically turn on at dusk and off at dawn.

### Cleaning and Maintenance

Wipe away any dust with a damp cloth if the solar panel is covered by dust, snow or other debris for an extended period of time, the battery will not recharge properly.

## Replacing the battery

1. Push the on/off switch to the OFF position.
2. Remove the retaining screw with a small screwdriver (not supplied).
3. Slide and open the battery cover.
4. Remove the old battery and dispose of it safely.
5. Insert new battery into the compartment following the correct + and - markings.
6. Avoid short circuiting the terminals of the battery.
7. Refit cover and refit retaining screw.

## BATTERIES

- Keep batteries away from children and pets.
- Do not mix used and new batteries.
- Remove the batteries if left for long periods.
- Never dispose of batteries in a fire.
- Battery disposal, spent or expired batteries must be properly disposed of and recycled in compliance with local regulations. For detailed information, contact your local authority.
- Follow the battery manufacturer's safety, usage, and disposal instructions.

## DISPOSAL

- Dispose of all packaging, paper, cartons, plastic and plastic bags in accordance with your local recycling regulations.
- At the end of the product's lifespan please dispose of it at an authorised household WEEE waste recycling centre.
