ASSEMBLY INSTRUCTIONS / INSTRUCTIONS FOR USE:

Unpack the components carefully

Always position in direct sunlight.

Instructions to use

CHARGING AND OPERATION:

1. Set button which is located underneath the solar panel to "ON" position for charging and charge by placing it in direct sunlight for at least 8 hours.
2. The light will work automatically. It will charge in direct sunlight during the day time and illuminate at night.

NOTE: In order to verify that the button is correctly set in the " ON " position, cover the solar panel with your hand and light should turn "ON" automatically.

ON/OFF

IMPORTANT:

1. Install the solar light in an area where it can get direct sunlight.
2. Leave the button in "ON" position.
3. Select an outdoor location away from other light sources at night, such as street lights. It may cause the product not to turn on automatically at night.
4. Duration of light depends on solar product's level of sunshine exposure, geographical locations, weather conditions and the hours of daylight.

MAINTENANCE AND TROUBLESHOOTING:

1. Make sure the switch is set to "ON" position.
2. Keep the solar panel clean.
3. If solar product does not light up after it has been used for around 8 – 12 months, replace the rechargeable batteries as they may be weak or worn out. (Battery 1pc "AAA" 1.2v 600Mah, Ni-MH, Rechargeable– Same equivalent type as recommended must be used).

BATTERY REPLACEMENT:

Step1: The battery compartment is located underneath the solar panel. Remove battery compartment cover by using a small Phillips head screwdriver (not included) .

Step2: Remove the exhausted battery and install 1pc new AAA rechargeable battery according to the polarity symbol indicated on the battery compartment. Open the compartment carefully and ensure that welding wires inside the battery terminals are not damaged.

Step3: Replace battery compartment cover, screw it back into position and make sure it is properly sealed.
