- SIMPLY STAKE INTO THE GROUND IN AN OPEN AREA TO GET MOST ACCURATE READINGS
- ALWAYS KNOW THE WEATHER, DAY OR NIGHT!
- STANDING AT 158CM IT WILL MAKE A GREAT FEATURE IN YOUR GARDEN AS WELL AS BEING PRACTICAL
- WEATHER RESISTANT

### **ASSEMBLY INSTRUCTIONS / INSTRUCTIONS FOR USE:**

Unpack the components carefully. Please check all parts have been removed from the packaging.

To easily insert stakes into the ground, it is recommended to wet the ground first. To avoid damaging garden stakes when inserting into the ground, select a spot in soft, rock-free soil. Insert the base of the stake first then gently insert the rest of the stake into the base. DO NOT push directly against the solar cell or the ornament housing containing the actual LED light.

Note: Peel clear protective film off solar panel for full absorption of sunlight.

# **Changing solar rechargeable battery**

On the underside of the solar panel, turn the ON/OFF switch to ON to begin charging. The rechargeable battery must charge for approx. 8-12 hours in direct sunlight prior to use. To maximize charge time, position the unit in a location with plenty of unobstructed sunlight. Ensure that the solar panel is always clean in order to obtain the greatest possible collection of light. Occasionally clean with a damp cloth. Note: Never use solvents or abrasive cleaning agents.

## Solar light functionality

Lights will turn ON automatically at dusk.

Light will operate continuously for approx. 6 hours when fully charged.

# Warning

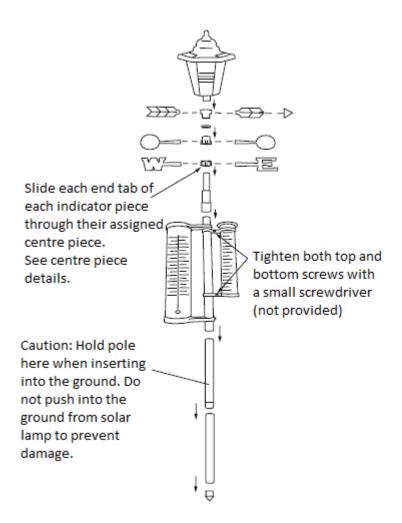

Liquid in thermometer is flammable. If broken, keep away from heat and open flames. Discard immediately and wash hands after handling. Causes skin and eye irritation. Do not inhale fumes. Harmful if ingested. Seek medical attention immediately.
