- IDEAL FOR SCATTERING FROM TREE BRANCHES, KIDS AND ADULTS WILL ALL FALL FOR THEM.
- Battery: 1 x 1.2V AAA battery rechargeable (included)

ASSEMBLY INSTRUCTIONS / INSTRUCTIONS FOR USE:

Unpack the components carefully. Please check all parts have been removed from the packaging. Find an ideal Place for the Solar Light.

Place the solar light in an area where it will receive direct sunlight for at least 8 hours per day. The number of hours the light will illuminate is directly proportional to the hours of sunlight it receives. If the light is placed in a shaded area, it will not be able to fully charge and its illumination time will be limited. Do not place the light near other outdoor lighting like porch or streetlights. These may fool the sensor and keep the light from coming on, or cause it to turn off automatically.

FIRST TIME USE:

Slide the ON/OFF switch to "ON" position, the light sensor will control the light automatically. When it gets dark, the solar light will turn on and use the energy stored in the battery. If you slide the switch again, the solar light will turn off to save energy.

If the solar light does not turn on automatically at night after 6 hours of charging during the day, please check the following:

- (1) Make sure the power switch is at the "ON" position.
- (2) Check the battery and make sure the battery contacts the terminal securely.
- (3) Make sure the solar light is located in a sunny location and the solar panel can receive direct sunlight.

Care and Maintenance Recommendations

- 1. Clean solar panel with a soft sponge every couple of weeks.
- 2. Make sure all connectors are still tight and no water getting in.
- 3. During the winter if you can bring it inside and give a good clean ready for next year.
