**GAINSBOROUGH**  
Garden & Wildlife

Always position in direct sunlight.

## Dimensions

4.8 x4.8 x30cm

- THESE PRETTY TULIPS WILL FIT IN PERFECTLY WITH THE REST OF THE FLOWERS IN YOUR GARDEN
- SCATTER THEM IN POTS, AMONGST FLOWER BEDS OR ALONG A PATH
- SOLAR POWERED THEY AUTOMATICALLY LIGHT UP AT NIGHT WITH A WARM WHITE LIGHT THAT GLOWS THROUGH THE COLOUR OF THE TULIPS
- STAKE DIRECTLY INTO THE GROUND AND THAT'S IT! MAINTENANCE FREE FLOWERS DAY AND NIGHT
- THE SOLAR PANEL IS INSIDE THE TOP OF EACH OF THE TULIPS SO THERE ARE ZERO WIRES AND THEY CAN EASILY SOAK UP THE SUN ALL DAY

- LEDs not replaceable

Battery: 1 x button cell 40mAH rechargeable battery

## ASSEMBLY INSTRUCTIONS / INSTRUCTIONS FOR USE:

Unpack the components carefully. Please check all parts have been removed from the packaging.

### Find an ideal Place for the Solar Light

Place the solar light in an area where it will receive direct sunlight for at least 8 hours per day. The number of hours the light will illuminate is directly proportional to the hours of sunlight it receives. If the light is placed in a shaded area, it will not be able to fully charge and its illumination time will be limited. Do not place the light near other outdoor lighting like porch or streetlights. These may fool the sensor and keep the light from coming on, or cause it to turn off automatically

To easily insert stakes into the ground, it is recommended to wet the ground first. To avoid damaging garden stakes when inserting into the ground, select a spot in soft, rock-free soil. Insert the base of the stake first then gently insert the rest of the stake into the base. DO NOT push directly against the solar cell or the ornament housing containing the actual LED light.

### How to use the Solar Light

Turn the switch to "ON" and place the light in a sunny location. If the light does not turn on automatically after a 6 hour charge please check the following:

- Make sure the battery is making correct contact with the terminals.
- Make sure the lamp is placed in a sunny location and the solar panels are facing the sun, the battery may not be fully charged when purchased.

\*Calls cost 7 pence per minute plus your telephone company's network access charge

### Replacing the battery

If the light stops working after it has been used for a long time (approx. 12 months), the battery may be beyond its lifespan. Please open the cover to replace the battery with a new rechargeable battery. Only use rechargeable battery for this product.

The lifetime of the LED lamp is over 60,000 hours. It is not necessary to replace it.

### Care and Maintenance Recommendations

1. Clean solar panel with a soft sponge every couple of weeks.
2. Make sure all connectors are still tight and no water getting in.
3. During the winter if you can bring it inside and give a good clean ready for next year.

### BATTERIES

- Keep batteries away from children and pets.
- Do not mix used and new batteries.
- Remove the batteries if left for long periods.
- Never dispose of batteries in a fire.
- Battery disposal, spent or expired batteries must be properly disposed of and recycled in compliance with local regulations. For detailed information, contact your local authority.
- Follow the battery manufacturer's safety, usage, and disposal instructions.

### DISPOSAL

- Coopers of Stortford use recyclable or recycled packaging where possible.
- Please dispose of all packaging, paper, cartons, packaging in accordance with your local recycling regulations.
- Plastics, polybags – Contains the following recyclable plastic.

Code & Symbol	
Type of Plastic	PE
Commonly used for	CD's, crisp packets, various flexible packaging, baby bottles, sunglass lenses
Notes	Not often or widely recycled

- At the end of the product's lifespan please check with your local council authorised household waste recycling centre for disposal.
