ASSEMBLY INSTRUCTIONS / INSTRUCTIONS FOR USE:

Unpack the components carefully. Please check all parts have been removed from the packaging.

Find an ideal Place for the Solar Light.

Place the solar light in an area where it will receive direct sunlight for at least 8 hours per day. The number of hours the light will illuminate is directly proportional to the hours of sunlight it receives. If the light is placed in a shaded area, it will not be able to fully charge and its illumination time will be limited. Do not place the light near other outdoor lighting like porch or streetlights. These may fool the sensor and keep the light from coming on, or cause it to turn off automatically

*Calls cost 7 pence per minute plus your telephone company's network access charge

Parts

CHARGING AND OPERATION:

1. Remove part F. First connect C to F and D to E. Part D has a small protective shell, which is tightened to protect the connection point.
2. Pass the wire of part B through hole G to connect part A. Part A has a protective shell to screw it on the connection point. Then carefully put the F part back in place.
3. Finally, there is a switch on the back of the solar panel, place the button in the "ON" position for charging by placing it in direct sunlight for at least 8 hours.
4. The light will work automatically. It will charge in directly sunlight during the day and illuminate at night.

NOTE: In order to verify that the button is correctly in the " ON " position, cover the solar panel with your hand and light should turn "ON" automatically.

Care and Maintenance Recommendations

1. Clean solar panel with a soft sponge every couple of weeks.
2. Make sure all connectors are still tight and no water getting in.
3. Keep the water clean during the summer keep topping up every 3 or 4 days with clean water.
4. Clean any pipes every month stop any build-up of algae which could put an extra pressure on your pump.
5. Take out any foreign body around the pump and keep clean solar product.
6. Always make sure there is enough water for the pump to work otherwise you could damage the pump.
7. Make sure you clean the pump on a regularly bases when you are cleaning face the solar panel face down on a towel this will stop the pump running or switch it off.
8. During the winter if you can bring it inside and give a good clean ready for next year.
