- WILL CREATE A WONDERFUL FOCAL POINT IN YOUR GARDEN

LEDs not replaceable

Battery: 1.2V AA 200mAh NI-MH, Rechargeable

ASSEMBLY INSTRUCTIONS / INSTRUCTIONS FOR USE:

Unpack the components carefully. Please check all parts have been removed from the packaging. Remove the protective film from the solar panel.

Find an ideal Place for the Solar Light.

Place the solar light in an area where it will receive direct sunlight for at least 8 hours per day. The number of hours the light will illuminate is directly proportional to the hours of sunlight it receives. If the light is placed in a shaded area, it will not be able to fully charge and its illumination time will be limited. Do not place the light near other outdoor lighting like porch or streetlights. These may fool the sensor and keep the light from coming on, or cause it to turn off automatically.

CHARGING AND OPERATION:

1. Set switch (located on the bottom of the item) to "ON" position, Charge the solar product by placing it under direct sunlight for at least 8 hours.
2. The light will work automatically. It will charge under direct sunlight during the daytime and illuminate at night.

NOTE: In order to test the lights simply cover the solar panel with your hand and the light should turn on automatically.

IMPORTANT:

1. Install the solar product in an area where it can get direct sunlight.
2. Leave the switch to "ON" position.
3. Select an outdoor location away from other light sources at night, such as street lights. It may cause the product not to turn on automatically at night.

*Calls cost 7 pence per minute plus your telephone company's network access charge

- Duration of light depends on solar product's level of sunlight exposure, geographical locations, weather conditions and the hours of daylight.

Care and Maintenance Recommendations

- Clean solar panel with a soft sponge every couple of weeks.
- Make sure all connectors are still tight and no water getting in.
- During the winter if you can bring it inside and give a good clean ready for next year.

TROUBLESHOOTING:

Make sure the switch is set to "ON" position.

If solar product does not light up after it has been used for around 8 – 12 months, replace the rechargeable battery as it may be weak or worn out. (Battery 1 pc AA 1.2v 200Mah, Ni-MH, Rechargeable– Same equivalent type as recommended must be used).

Battery replacement:

Step1: Unscrew the battery compartment cover by using a Phillips head screwdriver (not included).

Step2: Remove the exhausted battery and install 1x AA rechargeable battery according to the +/- polarity as beside image. Open the compartment carefully and ensure that wire inside the battery terminals are not damaged.

Step3: Replace battery compartment cover, screw it back into position and make sure is properly sealed.

BATTERIES

- Keep batteries away from children and pets.
- Do not mix used and new batteries.
- Remove the batteries if left for long periods.
- Never dispose of batteries in a fire.
- Battery disposal, spent or expired batteries must be properly disposed of and recycled in compliance with local regulations. For detailed information, contact your local authority.
- Follow the battery manufacturer's safety, usage, and disposal instructions.
