

Wireless Bicycle Computer

Thank you for purchasing the Wireless Bicycle Computer. We hope you will be satisfied with your purchase.
Note: A slight rattle sound in the product is normal. It is part of the design of wireless automatic function.

What's included

- 1 * Computer
- 1 * Sensor Transmitter
- 1 * Pad bracket
- 4 * Cable ties
- 1 * CR2032 battery
- 1 * Magnet
- 1 * Rubber band
- 1 * Instruction sheet

Note :

When attaching the sensor transmitter, battery cover and computer mounting holder, do not tear off the shim especially the shim on the back of computer battery cover. It is a part of the product and should not be torn off.

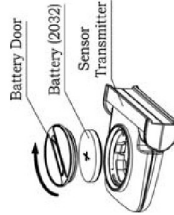

1 : Installation

Computer Battery Installation

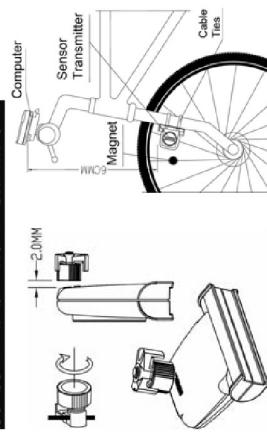

Remove the battery cover from the bottom of the computer by using a flat blade screwdriver. Install one CR2032 battery with the positive (+) pole facing the battery cover and replace the cover. Should the LCD show irregular figures, take out the battery and re-install it. "2060" appears on the screen means installation correctly.

Sensor Transmitter Battery Installation

Remove the battery cover from the bottom of the computer by using a flat blade screwdriver, install one 2032 battery with the positive (+) pole facing the battery cover and replace the cover. Should the LCD show irregular figures, take out the battery and re-install it.

Sensor Transmitter Installation

Attach the sensor transmitter to the left fork blade, the distance between computer and the sensor can not exceed 60cm, the closer the better. Using the shims to adjust the diameter, and using the cable ties(show above) to tie it with the fork(once fixing). Position the sensor transmitter and magnet as shows, make sure that the arc of the magnet intersects the alignment mark on the sensor transmitter with 1mm clearance.

Mounting Ring Installation

Attach the mounting ring with the cable ties to the handlebar, adjust the mounting Ring on the handlebar with the shims to hold its position.

Computer Installation

Attach the computer to the mounting shoe by sliding the unit until it snaps firmly into its position. To remove it, press the button on it in the opposite direction.

To check for proper speed function and sensor alignment, spin the front wheel with computer in speed mode. Adjust the position of sensor and magnet when there is no or weak reaction.

2 : Setting of Parameters

Once you have set the wheel size parameter to 'km/h or m/h, the rest of the parameters will change automatically while your tire is running.

If you need to re-set the settings once the computer is working, press both right and left button at the same time for at least 5 seconds. The "2060" code should appear and then you can re-set the wheel size. After this is done you can then set up km/h or m/h.

Wheel Size Input

"2060" appears on the screen when the battery has been installed, with one figure flashing, choose the correct wheel circumference from the table below. Press RIGHT button to advance digits as needed and LEFT button to confirm and advance. (The circumference ranges 0mm~9999mm), press LEFT button to enter KM/M mode.
