Threading the Needle:

While threading the Needle make sure the machine is unplugged and in the "OFF" position.

1. Start by raising the needle arm to its highest point by turning the rotary wheel in either direction.

2. Remove the bobbin pin and place the spool of thread on the bobbin and begin to thread through the thread guide to the tension control. Note: The spring must be in place before installing the bobbin.

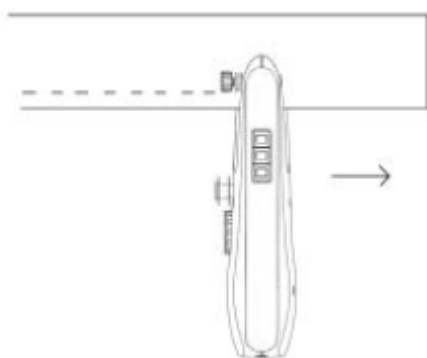

3. Draw the thread from the spool through the thread guide and pull the thread through the tension control. Do not wrap the thread around the tension control. Note: To loosen the tension control turn the dial clockwise.

4. Now pass the thread down and into the needle eye from back to front, pull about 2-4 inches of thread to the rear beyond the needle eye. Note: Must thread from back to front.

To begin sewing

1. Make sure your needle is properly threaded.
2. Lift up the fastening plate and place in the desired fabric underneath.
3. Make sure you have at least 2-4 inches of thread through the needle from back to front prior to sewing.

4. Hold the handle of the sewing machine and operate the power switch with your thumb.

5. Choose the speed you want, 2 dots for fast or 1 dot for slow by pressing the respective button.

Power connection:

Remove batteries before you use the USB power point. Insert the USB receiver into the energizing port of the Handheld Sewing Machine and plug the other end into the power port.

This product is suitable for general USB interface line, which can be connected to mobile power supply, computer, etc. The Handheld Sewing Machine needs to be kept plugged into USB port when being used at all times.
