- 100X15X15CM

ASSEMBLY INSTRUCTIONS / INSTRUCTIONS FOR USE:

Unpack the components carefully. Please check all parts have been removed from the packaging.

Before using first time

Allow lamp to charge for at least 8 hours in full sunlight with the ON/OFF switch in the ON position. The ON/OFF switch is located under the solar panel. Once the batteries are fully charged, set the ON/OFF switch to ON. If the lamp does not turn on after dark refer to Maintenance section.

Find an ideal Place for the Solar Light.

Place the solar light in an area where it will receive direct sunlight for at least 8 hours per day. The number of hours the light will illuminate is directly proportional to the hours of sunlight it receives. If the light is placed in a shaded area, it will not be able to fully charge and its illumination time will be limited. Do not place the light near other outdoor lighting like porch or streetlights. These may fool the sensor and keep the light from coming on, or cause it to turn off automatically

ON/OFF

*Calls cost 7 pence per minute plus your telephone company's network access charge

Replacing Battery

If the light stops working after it has been used for a long time (about 18 months), the battery may be beyond its lifespan.

Step1: The battery compartment is located underneath the solar panel. Remove battery compartment cover by using a small Phillips head screwdriver (not included) .

Step2: Remove the exhausted battery and install 1pc new AA rechargeable battery according to the polarity symbol indicated on the battery compartment. Open the compartment carefully and ensure that welding wires inside the battery terminals are not damaged.

Step3: Replace battery compartment cover, screw it back into position and make sure it is properly sealed.

Step4: Charge battery for at least 8 hours.

Care and Maintenance Recommendations

1. Clean solar panel with a soft sponge every couple of weeks.
2. Make sure all connectors are still tight and no water getting in.

BATTERIES

- Keep batteries away from children and pets.
- Do not mix used and new batteries.
- Remove the batteries if left for long periods.
- Never dispose of batteries in a fire.
- Battery disposal, spent or expired batteries must be properly disposed of and recycled in compliance with local regulations. For detailed information, contact your local authority.
- Follow the battery manufacturer's safety, usage, and disposal instructions.

DISPOSAL

- Coopers of Stortford use recyclable or recycled packaging where possible.
- Please dispose of all packaging, paper, cartons, packaging in accordance with your local recycling regulations.
- Plastics, polybags – this is made from the following recyclable plastic.

Code & Symbol	 PS
Type of Plastic	Polystyrene
Commonly used for	Insulation boxes, water cups, protective packaging inserts, take away containers
Notes	Not commonly recycled but waste management centres will recycle it.

- At the end of the product's lifespan please check with your local council authorised household waste recycling centre for disposal.
