Material: Glass and Metal

- COLOURFUL AMBRE EFFECT MOON AND STAR
- SOLAR POWERED
- CREATES A REAL FOCAL POINT IN YOUR GARDEN BY ADDING COLOUR BY DAY AND AT NIGHT WHEN IT AUTOMATICALLY ILLUMINATES
- WITH A WARM WHITE LED INSIDE A CRACKLED GLASS BALL
- 1 x AAA 1.2V NI-MH 300MAH Battery (not replaceable)

ASSEMBLY INSTRUCTIONS / INSTRUCTIONS FOR USE:

Unpack the components carefully. Please check all parts have been removed from the packaging.

Connect the top part with the stake part by twisting it together.

Before using first time

Allow lamp to charge for at least 8 hours in full sunlight with the ON/OFF switch in the ON position. The ON/OFF switch is located under the solar panel. Once the batteries are fully charged, set the ON/OFF switch to ON. If the lamp does not turn on after dark refer to Maintenance section.

NOTE: In order to verify that the button is correctly in the "ON" position, cover the solar panel with your hand and light should turn "ON" automatically.

Find an ideal Place for the Solar Light.

Place the solar light in an area where it will receive direct sunlight for at least 8 hours per day. The number of hours the light will illuminate is directly proportional to the hours of sunlight it receives. If the light is placed in a shaded area, it will not be able to fully charge and its illumination time will be limited. Do not place the light near other outdoor lighting like porch or streetlights. These may fool the sensor and keep the light from coming on, or cause it to turn off automatically

To easily insert stakes into the ground, it is recommended to wet the ground first. To avoid damaging garden stakes when inserting into the ground, select a spot in soft, rock-free soil. Insert the base of the stake first then gently insert the rest of the stake into the base. DO NOT push directly against the solar cell or the ornament housing containing the actual LED light.

*Calls cost 7 pence per minute plus your telephone company's network access charge
