- 1 X AAA 1.2V 300 NI-MH BATTERY (REPLACEABLE)
- CHARGING TIME – 6– 8 HOURS
- SOLAR PANEL SPEC – 2V 45MA
- EACH LANTERN INCLUDES 1 X WARM WHITE LED LIGHT (NOT REPLACEABLE)

ASSEMBLY INSTRUCTIONS / INSTRUCTIONS FOR USE:

Unpack the components carefully. Please check all parts have been removed from the packaging.

Before using first time

CHARGING AND OPERATION:

1. Set button which is located on the bottom of item to "ON" position for charging and charge by placing it under direct sunlight for at least 8 hours.
2. The light will work automatically. It will charge under direct sunlight during the day time and illuminate at night.

NOTE: In order to verify that the button is correctly in the "ON" position, cover the solar panel with your hand and light should turn "ON" automatically.

Find an ideal Place for the Solar Light.

Place the solar light in an area where it will receive direct sunlight for at least 8 hours per day. The number of hours the light will illuminate is directly proportional to the hours of sunlight it receives. If the light is placed in a shaded area, it will not be able to fully charge and its illumination time will be limited. Do not place the light near other outdoor lighting like porch or streetlights. These may fool the sensor and keep the light from coming on, or cause it to turn off automatically

*Calls cost 7 pence per minute plus your telephone company's network access charge
