

# BIG TOE STRAIGHTNER (PAIR)

Using this product can extend the toe naturally.

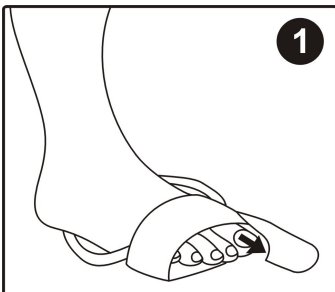

Bunions are more likely to occur in women who wear high heels with narrow, pointed toes, those with poor fitting shoes, and those with flat feet. Ill-fitting shoes that compress the feet often cause hallux valgus. Toe Straighteners are made of special fabric weave which protects a bunion from shoe pressure and friction so walking is easier, more comfortable, relieves pain and makes shoes fit and feel better.

#### Feature:

- To help reduce pain following bunionectomy by positioning the big toe in proper alignment.
- To prevent friction occurring in people with flat, wide feet.
- To help prevent deformity.

#### Care Instructions:

- If symptom is severe, consult a podiatrist, physician or health care professional before using this product.
- Bunions can be prevented by wearing comfortable, well-fitting shoes.
- While we anticipate no problems, if you should experience any discomfort while using the Toe Straighteners, please discontinue use immediately and contact your physician.
