- SPACING WIRES 30M
- CHARGING TIME – 8 HOURS
- WORKING TIME – 5 HOURS

WHITE STEADY ON LEDS (Not replaceable)

Includes 1xAAA 1.2V 300mAh rechargeable battery
Only use similar NiMH batteries. Do not use Lithium batteries.

ASSEMBLY INSTRUCTIONS / INSTRUCTIONS FOR USE:

Unpack the components carefully. Please check all parts have been removed from the packaging.

Before using first time

Allow lights to charge for at least 8 hours in full sunlight with the ON/OFF switch in the ON position. The ON/OFF switch is located below the solar panel.

Find an ideal Place for the Solar Light.

Place the solar light in an area where it will receive direct sunlight for at least 8 hours per day. The number of hours the light will illuminate is directly proportional to the hours of sunlight it receives. If the light is placed in a shaded area, it will not be able to fully charge and its illumination time will be limited. Do not place the light near other outdoor lighting like porch or streetlights. These may fool the sensor and keep the light from coming on, or cause it to turn off automatically

Care and Maintenance Recommendations

1. Clean solar panel with a soft sponge every couple of weeks.
2. Make sure all connectors are still tight and no water getting in.
3. If the light stops working after it has been used for a long time (approx. 12 months), the battery may be passed its lifespan. Turn off the solar light and open the cover of the battery compartment to change the battery. Battery specification: 1xAAA 1.2V 300mAh rechargeable battery.
