Please check with your telephone supplier.

1xDiamond blade:

It can be used to cut jade, glass and ceramic tiles. Use with pipeline outlets and special transfers

1xDiamond grinding rod:

The coarse type is used to sharpen knives, remove glass, metal surface burrs, etc

Saw Blade Assembly

1. Insert pipe
2. Slacken the nut
3. Hook up the blade on the front axis first and rear axis (direct the teeth towards the handle. Blades can be installed in 3 different directions: down, right and left)
4. Tighten the nut to fix the blade
5. Locate the front axis against a hard surface and push the handle to compress the frame
6. Retighten the nut as much as possible (the tighter the nut, you will get better performance)

Straight Saw Blade Assembly

1. Insert saw blade by pushing the pin

2. Pull out the blade by pushing the pin

How To Cut Glass And Tiles

The saw cuts glass and tiles with a tool tip attached to the frame

Just pull the tool tip attached to the saw frame towards handle direction at an angle of 45 degrees

Safety

1. Always wear safety gloves when using any saw
2. Mind your fingers when you cut any materials
3. Wear eye protection whenever cutting metals or other hard materials
4. Mount the workpiece in a vice or similar clamping device

DISPOSAL
