READY TO USE

WEEDBLAST

FAST ACTING WEEDKILLER

MAPP 20094, PCS No. 07007 - a ready to use formulation containing 60g/l acetic acid

Degrades naturally in soil, results within 24 hours

Effective against common garden weeds

LWEEDB005DUALF v1

USE PESTICIDES SAFELY. READ THE LABEL.

5 Litre e

WEEDBLAST FAST ACTING WEEDKILLER

Contains 60g/l acetic acid as a ready to use formulation, for the control of weeds on areas not intended to bear vegetation and unwanted vegetation. **DO NOT USE ON LAWNS.**

FOR AMATEUR USE ONLY AS A WEEDKILLER AND MOSSKILLER.

RISK AND SAFETY INFORMATION:

Read label carefully before use. If medical advice is needed, have product container or label to hand. Keep out of reach of children. Do not breathe spray. Remove/Take off immediately all contaminated clothing. **WASH HANDS AND EXPOSED SKIN AFTER USE. WASH OFF SPLASHES (IMMEDIATELY).** WHEN USING DO NOT EAT, DRINK OR SMOKE. Use appropriate containment to avoid environmental contamination. Do not empty into drains. Do not contaminate water with the product or its container. Dispose of contents/container to a household recycling centre as hazardous waste, except for empty containers which can be disposed of by recycling.

To avoid risk to human health and the environment, comply with the instructions for use.

MAPP 20094 PCS No. 07007

SAFETY INSTRUCTIONS:

Environmental protection:

Do not apply where rainfall is expected within 6 hours of application. Risk to non-target insects or other arthropods. Direct spray away from ponds and other surface water bodies. Do not empty into drains. Do not contaminate water with the product or its container.

Storage and disposal:

Keep away from food and drink. **KEEP PRODUCT IN ORIGINAL CONTAINER**, tightly closed and in a safe place.

INSTRUCTIONS FOR USE:

A minimum interval of 7 days must be observed between applications.

When to Use:

Weedblast Fast Acting Weedkiller is a ready to use non-selective weed and moss killer active against most soft plant tissue with which it comes into contact. Weeds and moss are controlled by covering their foliage completely and evenly with spray. After spraying, the foliage of treated weeds and moss begins to wither and die, effects become visible within 4 hours with full control after 24 hours. Plant roots are not killed, and new foliage may grow, particularly from the roots of perennial weeds. Annual weeds and moss with small roots die back completely but re-treatment will usually be necessary, especially to keep down perennial weeds. Use Weedblast Fast Acting Weedkiller to achieve control of weeds and moss. Best results are achieved against tender, small weeds, and moss less than 10cm high. Ideally spray in spring and repeat as necessary over the growing season, up to a maximum of 6 applications per year with a minimum interval of 7 days between applications. This pack covers up to 50 square metres.

Where to Use:

Weedblast Fast Acting Weedkiller may be used to control weeds and moss in a wide variety of situations, such as in unplanted areas of the garden, around buildings and in similar situations where weed control is required. Keep spray off vegetables, flowers, shrubs, and lawns.

How to Use:

Attach the hose lock trigger and turn the nozzle to the 'ON' position. Spray the foliage of the weeds or moss completely and evenly until the leaves and stems are fully wetted but avoid spray run off from the leaves (no more than 100ml/m²). After spraying turn the nozzle to the 'OFF' position. Repeat after 14 days against surviving weeds and moss if necessary, or when fresh growth is seen.

Apply on a dry day when rain is not expected. Do not apply where rainfall is expected within 6 hours of application. Rain after spraying may wash spray from the leaves and lead to a poor result. After spraying keep people and animals off dense patches of weeds and moss until the spray has dried, often just 15-20 minutes. However, this is not necessary for treated areas containing only occasional, low, or prostrate weeds and moss such as may be found on pathways.

Weedblast Fast Acting Weedkiller may cause some surfaces to become slippery for a short time after spraying. There are no residual effects of Weedblast Fast Acting Weedkiller in the soil. Sowing or planting may be undertaken as soon as the weeds or moss have died.
