

# 120W Rechargeable Tyre Inflator

## USER MANUAL

Please read this manual prior to using this product

## Product Description

① Air hose

③ Trigger

⑤ Pressure Gauge

② LED lamp

④ Handle

⑥ Charging interface

## ACCESSORIES

1 x USB Cable

3 x Multifunctional Nozzles

### **Technical Parameters**

**Cable length 1 metre**

**Clear LED pressure display**

**4000mAh battery charges via USB**

**Battery level indicator**

**120W output**

**7.4V/DC 5V**

**Pump inflates up to 150PSI**

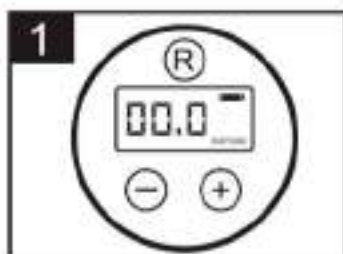

**Pressure displays in PSI, BAR, KPA or kg/cm2**

**Product Size: 20.5cm x 13.5cm x 55cm**

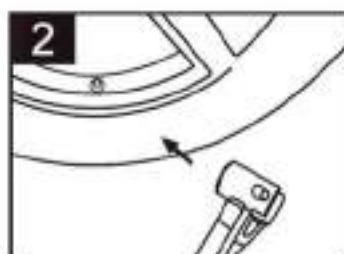

### **How to charge the product**

1. The product can be used right away.
2. To charge the product, connect the USB cable into power outlet.  
The indicator will turn Red while the product is charging.
3. The indicator will turn Green once the product is fully charged.
4. The charging time is around 4-6 hours.

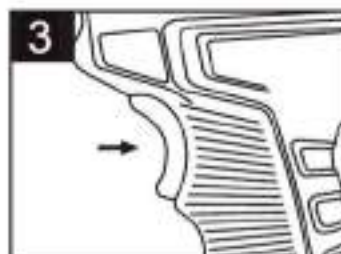

## How to inflate

Pre-set the pressure

Connect the gas tube  
to the valve of tire

Press the Trigger

**FINISHED**

The machine will stop  
inflating as soon as the  
tire pressure reach the  
pre-set pressure.

Then turn off the switch to trigger.

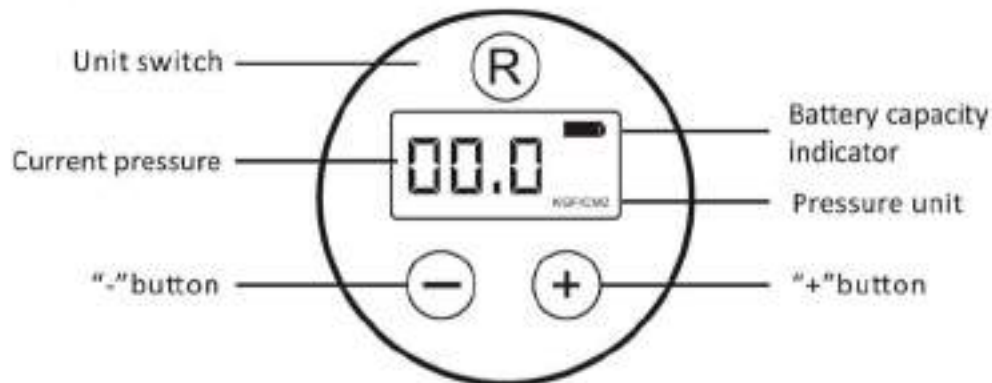

### Warning

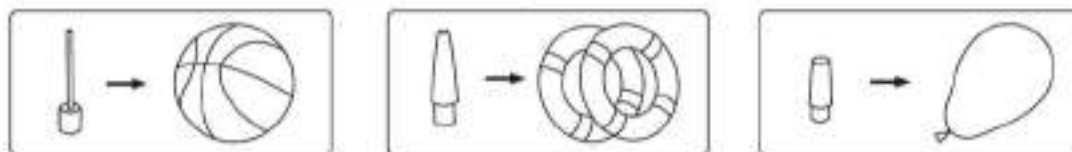

1. Before first use, please ensure the product is fully charged
2. Do not use in direct sunlight or under high temperature or pressure
2. Please make sure the trigger is off before charging
3. Do not charge the product while using

## Preset pressure

Press "R" to change the unit ,press "+" or "-" to choose the figures .After the figures stops flickering, turn on the switch to start work. The machine will stop automatically once the tire pressure reaches the pre-set pressure. Turn off the trigger after complete inflating.

## Multifunctional Nozzles

## Features

- 1.Handheld air pump,more convenient operation.
- 2.Three operation buttons ,accurate pressure display .
- 3.Metal cylinder ,long service life.
- 4.Shorter inflation time,lower noise.
- 5.LED lamp bring convenient use at night.
- 6.Preset pressure, stop automatically.

## Attention

1. Make sure the battery is fully charged before using.
- 2.Please lock the safety buckle when the product is not in use.
- 3.Do not disassemble ,repair or modify this product.
- 4.Do Not put it beside heat sources,such as car heat rejection outlet.
- 5.The product may warm up during use. This is perfectly normal.
- 6.The product will turn itself off automatically after 40 seconds if not in use.

## IMPORTANT SAFETY INSTRUCTIONS

**WARNING: READ AND UNDERSTAND ALL INSTRUCTIONS.** Failure to follow all instructions listed below may result in electric shock, fire, or serious personal injury.

**WARNING:** When using electric appliances, basic precautions should always be followed, including the following:

### WORK AREA

1. Keep your work area clean and well lit. Cluttered benches and dark areas invite accidents.
2. Keep bystanders, children, and visitors away while operating an inflator. Distractions can cause you to lose control.
3. Operate inflator in an open area at least 18" away from any wall or object that could restrict the flow of fresh air to ventilation openings.

### ELECTRICAL SAFETY

Use this product only with approved batteries and chargers.

### PERSONAL SAFETY

1. Stay alert, watch what you are doing, and use common sense when operating an inflator. Do not use inflator while tired or under the influence of drugs, alcohol, or medication. A moment of inattention while operating inflator may result in serious personal injury.
2. Dress properly. Do not wear loose clothing or jewellery. Contain long hair. Keep your hair, clothing, and gloves away from moving parts. Loose clothes, jewelry, or long hair can be caught in moving parts.
3. Do not overreach. Keep proper footing and balance at all times. Proper footing and balance enables better control of the inflator in unexpected situations.
4. Use safety equipment. Always wear eye protection. Dust mask, non-skid safety shoes, hard hat, or hearing protection must be used for appropriate conditions.
5. Eye protection is required to guard against fasteners that may have come loose and debris which could cause severe eye injury.
6. Do not disassemble the inflator.
7. Do not operate inflator near flammable liquids or in gaseous or explosive atmospheres. Internal sparks may ignite fumes.
8. Do not store your inflator in a damp or wet location. Do not store in locations where the temperature is less than 10°C or more than 37.7°C. Do not store in outside sheds or in vehicles.

### INFLATOR USE AND CARE

1. Check hoses for weak or worn condition before each use, making certain all connections are secure. Do not use if damage or wear is found. Purchase a new hose or notify an authorised service center for examination or repair.

## IMPORTANT SAFETY INSTRUCTIONS

Store idle inflators out of reach of children and other untrained persons.

Use only accessories that are recommended by the manufacturer for your model. Accessories that may be suitable for one inflator may create a risk of injury when used on another.

Keep the inflator and its handle dry, clean, and free from oil and grease. Always use a clean cloth when cleaning. Never use brake fluids, gasoline, petroleum-based products, or any strong solvents to clean your inflator.

Never point any inflator toward yourself or others.

Do not exceed the pressure rating of any component in the system.

Protect material lines and air lines from damage or puncture. Keep hose and power cord away from sharp objects, chemical spills, oil, solvents, and wet floors.

## SAFETY PRECAUTIONS FOR INFLATOR

**Risk of bursting.** Do not operate inflator to result in output pressure greater than marked maximum pressure of item to be inflated. Do not use at pressure greater than 6.8 Bar.

**To reduce the risk of electric shock, do not expose to rain.** Store indoors.

Inspect unit for cracks, pin holes, or other imperfections that could cause inflator to become unsafe. Never cut or drill holes in the inflator.

Make sure the hose is free of obstructions or snags. Entangled or snarled hoses can cause loss of balance or footing and may become damaged.

Use the inflator only for its intended use. Do not alter or modify the unit.

Always be aware that misuse and improper handling of this inflator can cause injury to yourself and others.

Never leave an inflator unattended with the air hose attached to the item being inflated.

Do not continue to use an inflator or hose that leaks air or does not function properly.

Household use only.

Do not use inflator as a breathing device.

Never direct a jet of compressed air toward people or animals. Take care not to blow dust and dirt towards yourself or others.

Protect your lungs. Wear a face or dust mask if the operation is dusty. Following this rule will reduce the risk of serious personal injury.

To reduce the risk of over inflation, use a reliable pressure gauge periodically during inflation.

The pressure gauge on the inflator is for reference only and is therefore not binding for exact values.

Never leave the inflator unattended during operation.
