

PACK OF 3 WATER FILTERS

Item No: R121

Instructions for Use v001: 18/11/25

Please read and retain these instructions for future reference

INSTRUCTIONS FOR USE:

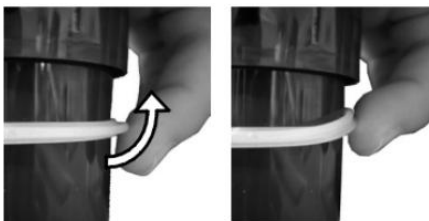

1. Remove the filter from its packaging then lie on its side and fully cover and soak the filter in cold clean water for 30 minutes.
2. Place Lower water tank and Upper water tank onto the chiller base unit.
3. Insert filter and ensure it sits flat and fully seated.

If Filter Keeps Floating:

Re soak the filter by laying on its side in a container then fully cover and soak the filter in cold clean water for 30 minutes to expel any remaining air inside completely.

Should the filter continue to float, it could be that the rubber seal has twisted. To fix, roll the seal over one quarter turn, push up under the lip and try the fitment again.

NOTE: The filter will require changing every 2 - 3 months depending on use.

Replacement Filters can be purchased from
Coopers of Stortford - Product Code R121 -
PACK OF 3 WATER FILTERS
