

Knife Sharpener 6267

Instructions

The Knife Sharpener, features customised mixtures of 100% diamond abrasive specially designed to sharpen both straight edge and serrated knives.

It is a two-stage sharpener to ensure precise and consistent angle control stroke after stroke. The edges are simultaneously shaped and sharpened.

The abrasives consist of selected 100% single-diamond crystals embedded on unique support plates.

The Sharpener is easy to use whether you are right or left-handed. Sharpening stages 1 and 2 are marked on both sides of the sharpener for ease of use.

General sharpening instructions

Make certain the blade is clean free of all food, fat and grease-then proceed as follows:

Remove clear plastic cover.

Holding the handle of the knife in your right hand, place the blade into one of the "v-shaped" slots (stage 1) and move the blade smoothly back and forth along the entire blade length. Continue this back-and-forth motion until the blade is sharp. Repeat for the other slot for stage 1

Generally 10 back-and-forth strokes in Stage 1 is sufficient to develop a sharp edge. If the knife is very dull it may take more strokes. Do not proceed to Stage 2 until the edge is very sharp. Then, make 10 back-and-forth strokes in Stage 2 to hone the edge to shaving sharpness, again using both slots.

Suggestions

If left-handed, turn the sharpener around, hold the Sharpener with your right hand and the knife with your left, and follow sharpening and honing instructions above.

Always wash the knife after sharpening and before use.

- 2 Stage process
- Use left or right handed
- Keep your knives razor sharp
- Uses 100% Industrial diamond abrasives
- Will hone and reshape blades to their original shape

Packaging

Dispose of the packaging at your local recycling centre.

Dispose of paper and box separately from plastic bags at your local recycling centre.

Dispose of the item at the end of its lifespan at your local authorised household waste recycling centre.
