Steam Brush 6902 Instructions

Main Parts
Please review the following diagram that shows important product features:
1. Water tank plug
2. Shatterproof water tank
3. Power indicator light turns red when steamer is plugged in, light turns off when ready for use
4. Steam release button
5. Slide button for releasing attachments
6. Comfortable, easy grip handle
7. Cord protector
8. Flat Brush attachment
9. Filling cup for easy pouring into water tank
10. Detail Brush for cleaning in small areas
11. Upholstery Brush attachment

MAINTENANCE
After use, unplug the steamer and allow to cool down completely. Remove plug from water tank and empty all water.

Never use additives
Use of distilled or de-mineralised water will reduce the need to clean your steamer and will prolong its life. However, ordinary tap water may be used as well. Use only water (preferably distilled or de-mineralised although tap water is okay) and no other liquid or additive in your steamers water tank.

Additives such as cleaning agents, detergent, salt, perfumes and dyes should never be added to the water tank.

Some of these substances are highly flammable which could result in bodily harm or death and some additives will corrode or clog internal parts.

Storing the Steamer
Before storing your steamer, empty all water from the unit. Water can become stale with time and may clog internal parts.

CLEANING MINERAL DEPOSITS
One common problem that may occur with a steamer is mineral deposits caused by a high mineral content in many municipal water supplies. Mineral residue inside the internal pipes and heater can cause intermittent steaming or, in some cases, no steaming at all.

NOTE: To reduce or eliminate the occurrence of mineral deposits, we recommend the use of de-mineralised or distilled water in the unit. However, regular tap water can also be used.

The recommendations that follow can be used to reduce mineral deposits. If not using de-mineralised or distilled water, we recommend you follow this procedure monthly.
1. Make sure the unit is unplugged and cool.
2. Mix a solution of 50% vinegar and 50% water. 2oz of this solution will be sufficient.
3. Remove the water tank plug and slowly pour the mixed solution into the water tank and replace the water tank plug.
4. Let stand for 40 minutes.
5. Drain the solution out of the water tank unit into a sink or tub.
6. Pour clean water in the tank and drain. Repeat this step until the vinegar odour dissipates.
7. Reassemble the unit and operate normally.

PACKAGING
Dispose of the packaging at your local recycling centre.
Dispose of paper and carton separately from plastic bags at your local recycling centre.
Dispose of the item at the end of its lifespan at your local authorised household waste recycling centre.

Packaging
Dispose of the packaging at your local recycling centre.
Dispose of paper and carton separately from plastic bags at your local recycling centre.
Dispose of the item at the end of its lifespan at your local authorised household waste recycling centre.
IMPORTANT SAFEGUARDS

When using your steamer, basic precautions should always be used, including the following:

Read all instructions:
1. To reduce the risk of contact with hot water and steam emitting from steam vents, always check appliance for leaks before each use.
2. Do not use the steamer if you see steam coming from anywhere besides the steamer surface.
3. Never pull cord to disconnect from mains, instead hold plug and pull to disconnect.
4. Do not allow cord to touch hot surfaces. Let appliance cool completely before putting away. Loop cord loosely around appliance when storing.
5. Always unplug appliance from mains when filling with water or emptying water, and when not in use.
6. Do not operate appliance with a damaged cord or if the appliance has been dropped or damaged.
7. Do not use outdoors.
8. Use the steamer only for its intended use.
10. To protect against fire and injury from electric shock or injury to persons.
11. The steamer is not a toy. Do not use the product by children.
12. Do not touch steam plate or brushes when attached and steaming, burns could occur.
13. Always unplug from mains when not in use and before cleaning. Allow appliance to cool before putting on or taking off parts, and before cleaning the appliance.
14. Never attempt to install attachments while appliance is plugged in and/or steam in coming out of steam plate.
15. Do not use accessory attachments that do not come with the unit, as this may result in fire, electric shock or injury to persons.
16. Do not let cord hang over edge of table or counter, or touch hot surface. The power cord should not be kinked or obstructed in any way.
17. Do not operate the steamer without properly filling the water container.
18. Never attempt to steam clothing while on body.
19. Never push the steam button or direct steam toward, anyone face or close to skin. Doing so could burn or scar skin or eyes.
20. To reduce the likelihood of circuit overload, do not operate another high-wattage appliance on the same circuit as your steamer.
21. If an extension cord is absolutely necessary, a 15amp rated cord should be used. Cords rated for less amperage may overheat. Care should be taken to arrange the cord so that it cannot be inadvertently pulled or tripped over.
22. To prevent steam from causing bodily injury or damage to surface, never lay steamer on floor or other surface while turned “on”.
23. NEVER USE DETERGENT, CLEANING CHEMICALS, SALT, PERFUME, DYES, OR ANYTHING OTHER THAN WATER IN YOUR STEAMER’S WATER TANK. Some of these substances are highly flammable which could result in bodily harm or death and some additives will corrode or clog internal parts.

BEFORE FIRST USE
1. Remove any packaging materials from the appliance.
2. Fill the water tank according to the OPERATING INSTRUCTIONS section.
3. Add attachments according to the ADDING ATTACHMENTS section.
4. Note that the water tank may have water residue left in from testing at the factory. This is normal. Rinse out before use.

Adding Attachments, how to change the flat brush or upholstery brush attachments.
WE RECOMMEND YOU LEAVE THE FLAT BRUSH ATTACHMENT FOR IMPROVED WRINKLE REMOVAL.
1. Select an attachment. The upholstery brush attachment is great for steaming drapery and upholstery. The flat brush attachment works best for linen, wool, and soft fabrics such as silk.
2. To detach: Unplug and allow steamer to cool completely before detaching. Next, push the slide button down and lift off attachment (see figure 1).
3. To attach: Align top of attachment into top of steam plate and press lightly to snap into place.

OPERATING INSTRUCTIONS
Getting ready to steam
Adding water:
1. Make sure steamer is unplugged and cool.
2. Remove the water tank plug (see figure 2).
3. Add water to the water tank using the cup provided. We recommend the use of distilled or de-mineralized water to prolong the life of your steamer. However, tap water is acceptable.
4. The maximum volume is about 3oz or 100ml.
5. Insert plug into the top of the water tank, ensuring it is tightly sealed.

Operating Steamer:
1. Add water according to OPERATING INSTRUCTIONS section.
2. Plug steamer cord into mains. Power indicator light will glow red.
3. When the Power indicator light goes off, the steamer is ready to use.
4. Run steam plate or brush attachment evenly over area to be steamed, pumping the steam button on the handle up and down to release steam. When steaming, touch material lightly with steam plate or brush attachment and move up and down to remove wrinkles. Continue to pump the button up and down to maintain a consistent flow of steam. It is important that you make contact with the garment and/or fabric you are steaming.
5. The steamer can be used in any direction, horizontally or vertically.
6. If water gets low, unplug steamer and allow to cool completely. Next, remove water tank plug and add more water without exceeding the maximum amount of about 3oz. Re-insert water tank plug securely and resume use. DO NOT ALLOW THE WATER TANK TO RUN DRY WHILE STEAMING, AS THIS COULD DAMAGE YOUR STEAMER.

For Best Results:
• Some articles can be steamed better by steaming from the underside.
• When steaming, touch material lightly with steam plate or brush attachment and move up and down to remove wrinkles. It is important that you make contact with the garment and/or fabric.
• The steamer will not remove stains from garments.
• Never steam clothes while wearing them.

The steamer works on most fabrics, including silk, denim, cotton, polyester and wool.

PLEASE REFER TO LABEL ON ITEM OF CLOTHING TO CHECK IF GARMENT CAN BE STEAMED.

IN GENERAL, SOME FABRICS, E.G., LEATHER, SUEDE AND VELVET MAY NOT BE SUITABLE FOR STEAMING.

TO ENSURE YOUR GARMENT IS SUITABLE FOR STEAMING, STEAM A SMALL PART OF THE INSIDE OF THE GARMENT TO TEST THAT IT DOES NOT DAMAGE THE FABRIC BEFORE STEAMING THE ENTIRE GARMENT OR FABRIC.

TROUBLESHOOTING
• Sometimes the power light will go out and when the steam button is pressed, no steam comes out – please continue to press the steam button a few times and the steam will start. Please ensure the steamer is facing away from you as the steam will start suddenly and quite fiercely!
• Even if the power light is on, the unit will still steam. It should go off again in a few seconds.
• It is normal that not every press of the steam button will generate a burst of steam as the unit needs a few seconds to generate the steam between bursts.
