

Operation

The Super Coil Hose is specifically designed to self-recoil, all you need to do is wander around your garden watering your plants, then walk the hose back to the tap.

Assembly

1. Connect the female thread end to the tap, if necessary various adapters will be available to purchase from your local garden centre or hardware store.

2. Turn on the tap, slowly at first to test for leaks and the spray gun operation, and then adjust to the pressure required, lower for watering or higher for cleaning.

5 Function Spray Gun

Turn the dial of the spray gun to switch between functions.

Safety and Maintenance

- Do not let the hose go when fully stretched, walk the hose back to the tap.
- Do not connect to a hot water tap.
- Do not point the spray gun at people or animals, do not allow children to play with this item.
- Clean the hose occasionally with a damp soft cloth, do not use detergents or abrasive cleaners.
- Do not store in direct sunlight. Store neatly away.
- Do not store spray head in freezing conditions.
- Do not allow residual water inside hose or spray head to freeze as this will cause damage to the item.

Packaging Disposal

- Dispose of the packaging at your local recycling centre.
- Dispose of paper and carton separately from plastic bags.
- Dispose of the appliance at the end of its lifespan at your local authorised household waste recycling centre.
