

Wheeled Garden Sprayer

Instructions 7639

Parts:

Handle
Sprayer body
Lance

First insert the handle bar into the slots on the sprayer body and secure in place using the screw collar.

Insert the lance into the connector at the end of the hose and secure in place with the screw collar.

Instructions for use:

Fill the sprayer with the intended liquid, taking care to read the manufacturers safety and usage guides for the chemicals.

Pump the handle on top of the sprayer vigorously until the pressure builds up inside and the handle becomes more difficult to pump.

Repeat this process when necessary.

The trigger can be pushed forward to have continuous spraying, and the nozzle is adjustable from fine spray to jet.

To release any remaining pressure when finished pull the green valve at the front of the sprayer out.

Cleaning instructions:

Clean the sprayer out with fresh water, any residual liquid must be disposed of according to local by-laws and regulations.

Make sure you rinse out the sprayer, pump unit and lance a number of times if you are going to change the chemical used i.e. weed killer to plant feed.

Storage instructions:

Store out of direct sunlight and ensure the sprayer is empty.

This is not a toy, keep out of reach of children especially when chemicals have been used.
