

Double Glazing Window Film 8885

Ensure the surface of the window frame is clean and free from grease and dust.

Apply the double sided tape to the window frame. Peel off the top layer of tape.

Apply the window film to the tape, trying to keep as flat and taught as possible. Cut away any excess. If the window is small, you may find it easier to cut to size first.

Gently apply a warm hairdryer over the film surface, do not get too close! This will tighten the film and remove any remaining creases.

Packaging

Dispose of the packaging at your local recycling centre.

Dispose of paper and box separately from plastic bags at your local recycling centre.

Dispose of the item at the end of its lifespan at your local authorised household waste recycling centre.
