

### Recommended use:

- For repairing gouges or holes in metal, wood, plastics, ceramics, stone and concrete.
- Emergency repair for leaking pipes/tanks.
- Can be drilled, sanded and tapped within 10-15 minutes after mixing.
- Can be painted over when fully cured after 24hrs.

### How to use:

- Wash hands thoroughly with soap & water before beginning.
- Cut off the required amount, roll, fold and knead together vigorously until thoroughly mixed into a uniform colour.
- Use water on fingertips to smooth & feather putty into shape.
- On average will harden and be ready to use in 10-15 minutes after mixing.
- Replace remnant putty in the tub provided after use.

### DISPOSAL

Dispose of all paper, cartons and plastic in accordance with your local recycling regulations. At the end of the products lifespan please dispose of it at an authorised household waste recycling centre.
