

## **Greena® Sludge Remover**

Actively consumes sludge which collects at the bottom of a pond.

Best to use after Greena® Algae Treatment which removes dead algae & consumes decaying pollutants in ponds that are harmful to fish.

Instructions for use:

1. Calculate pond volume – (L x W x D in metres x 1000 = pond volume in litres)
2. Unscrew top of measuring chamber.
3. Gently squeeze bottle until required amount is in the measuring chamber – use 10ml for every 250 litres.
4. Dilute the product in a watering can (remove rose) or bucket of pond water and apply around edge of pond and then as far into the centre as possible
5. Use weekly for one month and then monthly to maintain clarity.
