

**ASSEMBLY/INSTRUCTIONS FOR USE:**

Slide the ends of the hanging chain through the holes in the rim of the basket, and spread the wires apart, as shown in Figure 1. Place the reservoir into the basket and slide the Water Level Indicator into the hole shown in Figure 2.

**Important:**

Remove the plug on the bottom of the basket when hanging it outdoors. This will allow excess water to drain.

The hanging basket holds about 3.8 litres of planting mix. You can also add slow-release granular fertilizer. Pre-moisten the planting mix and fill your planter to within 2" to 3" (2.5 – 5cm) of the top edge. Add your plants and additional soil, if needed. NOTE: Do not cover the water port with planting mix (Figure 2).

Water the basket from the top to thoroughly moisten the soil and settle the plant roots. Fill the water reservoir by pouring water into the water port.

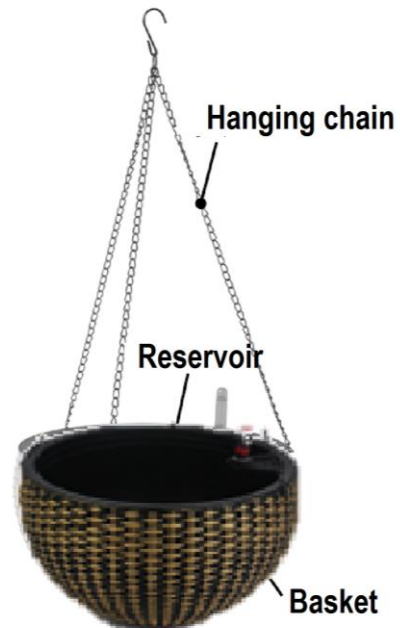

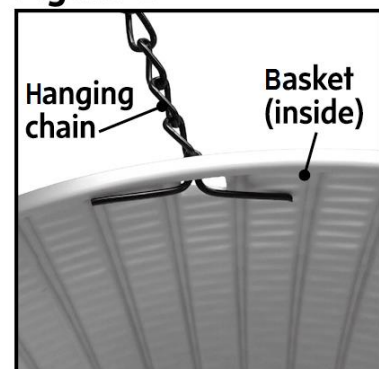

**Care and Maintenance**

Check the water level indicator and the soil moisture regularly. Keep the reservoir full and water from the top as needed to keep the soil moist. Daily inspection may be necessary, especially if it is hot and dry for extended periods. Plants will use more water as they grow larger.

Empty the reservoir and planting mix/compost or move the hanging basket indoors prior to freezing weather to avoid damage to the basket.

**DISPOSAL**

- Dispose of all packaging, paper, cartons, plastic and plastic bags in accordance with your local recycling regulations.
- At the end of the product's lifespan please dispose of it at an authorised household waste recycling centre.
