

Unscrew the 3 screws, and open the cover to replace batteries.

## Before use:

- Each unit requires **2 x AA 1.2V NI-MH rechargeable batteries** (included ).
- Choose a location with direct sunshine, where the solar panel can receive at least 6 hours of sunshine each day.
- Shady locations will influence the batteries charge and may shorten the working time of the light.
- Weather conditions and season will affect how much the batteries are able to charge during the day.
- The solar light is ideal for the night time illumination of your garden, lawn, patio and walkway.
- The surface of the solar light must be kept clean to maximise the efficiency of the light.

## Instructions for use:

(For illustration only. Actual colour Black)

- To maximise and prolong the batteries life, please ensure the switches are on and allow the solar panel to charge in full sunlight for 1 full day before first use. The light is then ready for use.
- To affix to your gutter, unscrew the small thumb screw.
- Insert the long arm into the recess and screw the small thumb screw back into place. Position the light over the gutter and secure by tightening the long screw (twist clockwise).
- Remember to peel the protective film from the solar panel and have set the switch to ON position to activate the light.

**CARE AND CLEANING INSTRUCTIONS:**

- Always switch off and remove batteries when not in use.
- Do not shine light directly towards eyes.
- Do NOT immerse in water.
- Do NOT use abrasive cleaners or sharp utensils to clean this appliance.
- Store the item in a cool, dry place.
- Wipe with a clean dry cloth.
