SIMPLE FUNCTION USE:

This activity tracker counts your steps based on your height, weight, stride and age and thus calculates the distance covered and calories burnt. It can be used for basic functions without the APP.

Basic functions are Counting Steps, Distance travelled and Calories which can be read by pressing the button on the tracker. Basic functions will automatically reset to zero every day at midnight. They cannot be reset manually.

Note: Date and time cannot be set manually. This requires synchronisation with APP (see page 4).

Specifications:

Display: OLED 0.86 inches
Power by: built-in 50mAh Li-polymer battery
Charging time: approximately 1 to 2 hours
Standby Time: approximately 4 to 10 days depending on how often you use it
Working Temperature: 0-40℃
System requirement: Bluetooth 4.0 or above, Android 4.3 or above, iOS 8.0 or above.

Accessories:

Instruction manual and mini USB charging cable

Charge the activity tracker:

Before using this activity tracker, please make sure its built-in battery is fully charged. The micro USB jack is located on the back of the tracker body. Use the supplied mini USB cable to connect the tracker body with the USB port on your PC or laptop. When it is connected properly, a battery symbol displays on screen of the device indicating the charging process. It takes approximately 1 to 2 hours for full charging and the battery symbol will turn to full capacity when charging is complete. Disconnect the USB cable. The Activity Tracker is then ready for use.

ADVANCED FUNCTIONALITY:

To Operate the activity tracker:

Press the button on side of the tracker body to change the screen interface to read time, date, step, distance, calories in turn and to control camera or music play by remote.

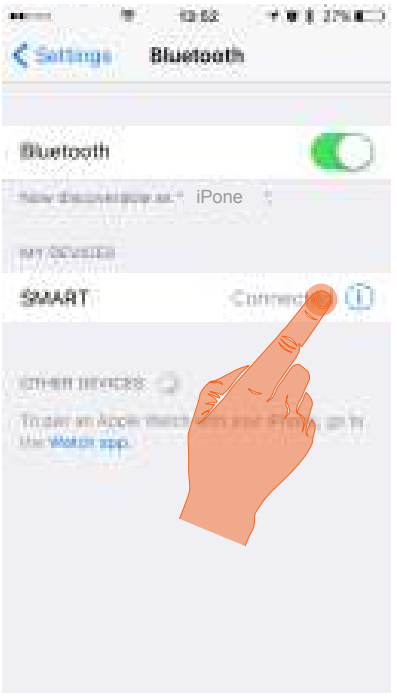
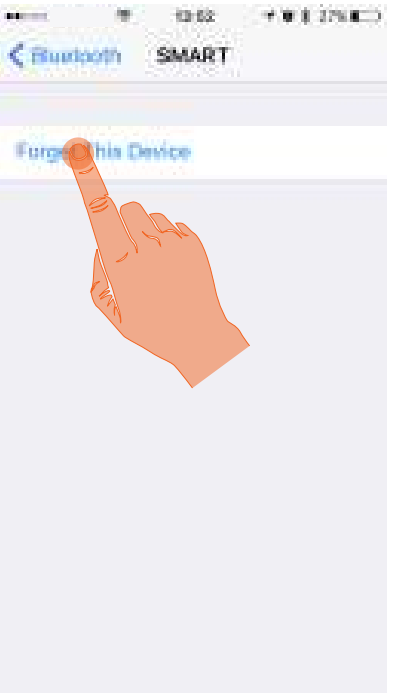
Device unbinding

After unbinding the device, please check your smart phone settings of Bluetooth and tap “Forget this Device”.





Cautions

1. Before using the device, please connect it to the APP for synchronization of time settings with your smart phone.
2. “GoBand” is a reliable APP. We suggest you set your smart phone to allow it to work continuously. However, it is normal that the tracker may sometimes disconnect from your smart phone. You can just resume the APP to reconnect the device and synchronize the tracker. In some rare cases, if the connection fails, please reboot your smart phone and research the device on the APP.
3. Every time you want to check activity data from the APP, please resume the APP and synchronize it with the device, then the data will be uploaded to the APP.
4. All data including steps, distances and calories displayed on the device are automatically reset to zero at every midnight (0:00 am). You can trace back the records on the APP as long as you have uploaded the data every day.
5. The activity data provided by this device is just for reference to monitor your exercises and sleeping quality but constitutes no medical information and the device is not treated as medical equipment.
6. Please keep the device away from humidity, extremely hot or cold environments.
7. This device is not waterproof. Please take it off before shower, swimming, surfing and diving.
8. Please always use the original supplied cable to charge the device.
9. Long time and tight wearing of the device, particularly in hot and humid environment, may cause skin allergy for sensitive skin.
