v002: 22/06/17

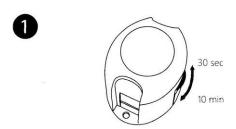

FOR INDOOR DOMESTIC USE ONLY

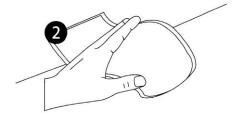

TECHNICAL DETAILS:

Package contains 2x1.5m LED light strip, 2x sensors, 1x mains power adapter (12V dc) LED consumes up to 7.5W to produce the same light as up to 25W incandescent bulb.

When stepping out of bed at night a light will turn on to guide you safely across the room. The soft illumination will then automatically turn off when no motion is detected.

Installation Instructions

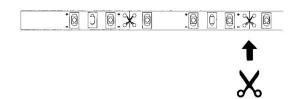

Timing adjustment

The factory set sensor timing time is 30 seconds which can be easily adjusted to any other time between 30 seconds and 10 minutes. Adjust the side of the sensor's button to 10 minutes. See Figure 1

Clean surface

Before installation, please completely clean and wipe the surface with a dry cloth. See Figure 2

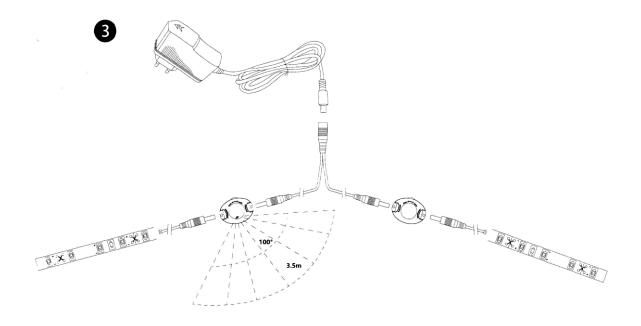

Option

LED Strip can be cut with scissors at the indicated symbol according to the length required.
