

ASSEMBLY INSTRUCTIONS / INSTRUCTIONS FOR USE:

It is recommended the set be tested prior to set up in the desired location.

Parts:

Each light contains the following components:

1. Solar panel with LED stand – 1pc
2. Ground tube – 1 pc
3. Pointed ground stake – 1 pc

**Installation:**

install the solar panel in a sunny location where it will receive maximum sunlight, for optimal and satisfactory illumination.

Any cover or shade over the solar panel will affect its ability to absorb sunlight, resulting in decreased brightness and duration of the LEDs. Cloudy weather will also impact the functionality of the lights.

Avoid installing the lights near night time light sources such as porch lights, street lights etc. These lights might prevent the solar lights from automatically illuminating.

Use the included tube and ground stake to install the lights. (See Fig. 1) Push the stake into the ground until it is firmly in place. Do not push on the solar panel as this could damage the unit.

Replace the Battery:

Remove bottom of solar panel.

Remove old battery and discard appropriately.

Replace with a new battery of identical size and ensure polarity of the battery is correct.

Note: Solar LED String Lights 50 LED use 1pc AA Ni-MH rechargeable battery per light (included).

BATTERY CAUTIONS:

- Keep batteries away from children and pets.
- Do not mix used and new batteries.
- Remove the batteries if left for long periods.
- Never dispose of batteries in a fire.
- Battery disposal, spent or expired batteries must be properly disposed of and recycled in compliance with local regulations. For detailed information, contact your local authority.
- Follow the battery manufacturer's safety, usage, and disposal instructions.
